Education

Moscow Institute of Physics and Technology.
Bachelor of Applied Mathematics and Physics.

Dolgoprudny, Russia.
In process.

Grades for informatics:
1st semester - 5 / 10
2nd semester - 10 / 10
3d semester - 9 / 10

GPA: 6.88

Studying / Study projects

DOTA Language Compiler : <https://github.com/SANEKDASH/DOTA-language-compiler>

April - May 2024

- ELF relocatable file format
- X86-64 instruction encoding
- Generating binary code basing on syntax tree

Used tools: C, asm, make, git.

Hash table : <https://github.com/SANEKDASH/Hash-table-optimization>

April 2024

- SIMD\AVX
- Intrinsic functions
- Profiling
- Optimization

Used tools: C, asm, perf, make, git.

Mandelbrot set : <https://github.com/SANEKDASH/Mandelbrot-optimization>

March -April 2024

- SFML
- SIMD\AVX
- Intrinsic functions
- Optimization

Used tools: C, make, git.

Akinator : <https://github.com/SANEKDASH/Akinator>

November 2024

- Tree data structure implementation

Used tools: C, dot, make, git.

Virtual machine : <https://github.com/SANEKDASH/SPU>

October 2024

- ISA
- Stack and RAM implementation
- VM assembler and disassembler

Used tools: C, make, git.

Introduction in memory management & concurrency course by Mikhail Molotkov :

September -December 2024

<https://github.com/SANEKDASH/MMAAndConcurrecnnyWorkspace>

- Allocators
- Garbage collectors
- Synchronization primitives
- Atomic operations
- Concurrent programming

Used tools: C++, cmake, git, gdb, gtest.

Technical skills:

- Programming languages : C, C++, x86-64 assembly, Python.
- Tools : pefr, git, tmux, edb, make, ssh.
- Other : LaTeX, HTML, dot, Markdown.

Soft skills:

Strong personality, communicability, teamwork, responsible.

Languages:

Russian, english.

Spheres of interest:

Operating systems, concurrency, memory management, optimizations, reverse engineering, cyber security.
